

Lynn Castiglione

Phoenix, AZ

As a teacher of gifted students in Arizona, I know that seamlessly infusing digital learning throughout the curriculum is a prerequisite for students to graduate from high school with the skills and knowledge they need to succeed in today's global economy. Access to high-speed broadband is the key to allowing modern teaching and learning to occur in all schools across the country. Many of my students are familiar with a blended learning model, and I find that it speaks to more learning styles than traditional ""brick-only"" learning.

The E-Rate program has been a phenomenal success in bringing internet access to almost every classroom in America. In the last funding cycle, applications from schools and libraries requested a total of more than \$5 billion—twice the amount of available funding. I respectfully urge the FCC to increase funding for the E-Rate program to at least \$5 billion to meet this demand. All students need access to high-speed broadband. Our nation's future depends on their success.
